Correction for the Results section of the Abstract is needed. There was a mistake in the numerical values of Results section of the Abstract.

In the Results section of the Abstract, the first sentence which previously read: "The mean age of the patients who underwent the surgery was 68.33 ± 6.97 years and the mean duration of the surgery and the postoperative duration of hospitalization were 87.31 ± 24.746 minutes and 79 ± 2.711 days, respectively."

But this sentence should have read: "The mean age of the patients who underwent the surgery was 68.33 ± 6.97 years and the mean duration of the surgery and the postoperative duration of hospitalization were 87.31 ± 24.746 minutes and 3.79 ± 2.711 days, respectively."

We apologize for any inconvenience that this may have caused.
